

Thinking within the space of possibilities offered by the Quadruple Helix

Main research question

Present a complex, socially relevant problem that is plausibly linked to your research (e.g. 'Sustainable urban mobility').

Formulate a key research question:

Transdisciplinary study design

Which academic disciplines and which stakeholders from the various sectors of the Quadruple Helix do you include in your research approach?

Work together as a group to develop a transdisciplinary study design for your research question:

In your research design, outline the active contributions and perspectives of all four roles and visualise them!
